SUMMARY

Systems automation engineer with three years of hardware validation and QC automation. Strong background in Linux and Bash; hands-on with IPMI, Redfish, ZFS, and SAS/HBA. Runs a self-hosted lab on Proxmox, k3s, FreeIPA, and WireGuard. Pursuing RHCSA (EX200); next: AWS SAA, Terraform Associate, CKA.

EXPERIENCE

(Independent Infrastructure Study)

Personal Lab | 2025 - Present

- Self-hosted lab on Proxmox: 3-node k3s cluster, FreeIPA identity/DNS, WireGuard VPN, redundant Pi-hole DNS
- Runs arpatek.dev on k3s behind Traefik with wildcard TLS; single inbound UDP port for WireGuard
- CI/CD via Gitea Actions and act_runner: builds to a self-hosted registry, rolls out to k3s on push
- Metrics, logs, and dashboards across 4 hosts via Prometheus, Loki, Grafana, Alloy, node_exporter
- Eight services documented in home.arpa: architecture, decisions, gotchas, and upgrade notes
- Preparing for RHCSA (EX200) on RHEL 10; Linux administration and Bash scripting coursework

(Senior Test Technician)

TrueNAS | 2021 - 2024

- Extended a 22,000-line Bash QC automation suite (CC & SWQC), contributing ~11,600 lines across 38 scripts
- Cut per-system validation from 30-60 min of manual checks to minutes of report review
- Automated BIOS, firmware, and HW validation via IPMI and Redfish API for 16+ server platforms
- Built Redfish automation for BMC hardening and BIOS diffing on liquid-immersion platforms
- Maintained the Jenkins pipeline publishing TrueNAS ISOs to iPXE; migrated netboot from PXE to iPXE
- Integrated with PBS archive servers and PostgreSQL to automate burn-in parsing and reporting
- Generated per-order diff sheets from a GOLD baseline for QC traceability
- Produced dated, attributed evidence bundles proving a unit shipped built-to-order and functional

(Computer Hardware Technician)

EMR CPR/Corovan | 2021

- Reconfigured and relocated desktop/server systems post-migration
- Troubleshoot hardware/software issues and blueprinted workstation layouts

(Post Production Specialist)

Freelance | 2016 - 2021

- Managed AV setup, live audio/video services, and video editing
- Designed and executed digital marketing strategies for SMBs

EDUCATION

- Google IT Automation with Python Professional Certificate | Completed
- Google IT Support Professional Certificate | Completed
- Red Hat Certified System Administrator | In Progress
- Online Training | Udemy / Coursera

PROFESSIONAL DEVELOPMENT

IT Support & Services / Advanced IT | JobTrain & StreetCode Academy

- Hands-on systems repair and rebuild work through StreetCode Academy

SKILLS

- Linux (RHEL, Ubuntu, TrueNAS/FreeBSD)
- Bash (primary), Python, HCL
- Ansible, Puppet, Terraform
- Docker, Kubernetes (k3s)
- Prometheus, Grafana, Loki
- IPMI, Redfish API
- ZFS, SAS/HBA, BIOS Firmware
- TCP/IP, VLANs, LAGG, WireGuard
- Git
